## Skills

- HTML
- CSS
- JavaScript
- Typescript
- Wordpress
- Contentful
- React
- NextJs
- Gatsby
- Redux
- REST API
- GraphQL
- SASS
- Tailwind
- Chakra UI
- Material UI
- GIT
- Bitbucket
- Azure
- FIGMA
- JIRA
- Asana

## Experience

2021 – 2022

Kortechs

### React/React Native Developer

I worked on an app related to travelling. The service we provided was taking our customers from their home address to the airport and vice versa. Users were able to book the ride on our platform at the specific date/time and also choose between different types of vehicles. There was a mobile app same as web in React Native. I have also worked on the backoffice. It enabled the agents to view/edit all of the rides, assign drivers and vehicles, view drivers statistics, leave notes from other agents etc...

2023 – 2025

Forga

### Frontend Developer

I worked on the development and implementation of e-commerce websites, focusing on frontend development with React and Next.js.

The projects were based on a headless architecture, with WordPress used as a CMS for content management.

I worked with TypeScript, GraphQL, Chakra UI, and Tailwind CSS, depending on the complexity and requirements of each project.

In addition to e-commerce projects, I also developed presentation websites and template-based systems that required a modular and flexible development approach.

October 2025 -

January 2026

Montenix

### Frontend Developer

I worked on a project that involved a complete redesign as well as enhancements to existing functionality, using React/Next.js, Tailwind CSS, and Contentful.

## Education

2009 - 2013

High school of economics

### Bachelor Degree of Birotehnicar

2015 - 2018

VSSSVSI- Sirmium

### Business informatics specialist

2019 - 2021
